

Warehouse Intersection Safety

Intersection Floor Sticker

Intersection Aisle Sign

Visit www.SafetyBanners.Org - Forklift Intersection Safety category
for more information and to order online.

- **Low Cost with EASY installation.**
- ***Forklift-Tough™* Floor Stickers, for IN-AISLE USE across your aisle.**
- **Aisle Intersection Signs for your Pallet Rack Uprights. FLEXIBLE, bend when struck.**

Place our Intersection Floor Stickers ACROSS your forklift aisles before an intersection as a warning to pedestrians and operators. Place our Aisle Signs on your uprights at the intersection.

- Our Intersection Floor Stickers are built *Forklift-Tough™* and anti-slip, for In-Aisle Use. They are guaranteed for one year under normal use. Copyrighted and Patents Applied For.
- Our Aisle Signs are FLEXIBLE. They bend when struck unlike dangerous metal signs. Our Aisle Signs are used for in-aisle, eye height forklift intersection safety. They come complete with adhesive backed flexible mounting brackets for your pallet rack upright support beams or any flat surface. (No drilling or screws required!) They are SUPER EASY to install.
- Our Standard Floor Sticker Signs are often used in conjunction with our intersection stickers and signs to enhance forklift area safety.

IMPORTANT: We guarantee our *Forklift-Tough™* floor stickers for one year under normal use. We do not guarantee our floor stickers against damage when a pallet is dragged across the sticker. No floor sticker, paint or even 3M's street markers, will survive for long having pallets dragged across them on the floor.
